Supported Education: Success & Satisfaction

PROMENS CARE
- (Young) People with psychiatric and intellectual disabilities.
- Area: The Netherlands, Drenthe (province); rural environment.
- 3500 clients, independent living and supported housing in the community.
- Services: Supported housing, employment, access to leisure activities and supported education.

THREE MODULES SUPPORTED EDUCATION

A: Advice about education
- Support with education-related questions of adolescents (phase Choose/Get).

B: Direct Skill Teaching
- For example: planning homework, studying for a test, responding to feedback.
- Number of skill lessons available (n=9).

C: Specialized Support with homework
- Outreaching education team: support on the spot.
- Young people need guidance by doing their homework. A teacher who encourages and motivates the adolescents.

Psychiatric Rehabilitation (Boston University Anthony-Farkas)

START & RESULTS SEd-PROGRAM

Quick Scan 2011:
- 70% of our young clients with psychiatric disabilities were unsuccessful at school (early school leavers).
- Without a regular diploma: no access to work and independent living.
- Since 2012, development of Supported Education within Promens Care.

Two groups of SEd-program participants:
- Adolescents (12-23) who still are at school and experience problems (keep).
- Adults (23+) who left school early without a diploma and wish to return to school (choose-get).
